Senior Product Designer with 8+ years of remote experience creating web and software applications, design systems, dashboards, and cohesive digital branding. Skilled in bridging visual design and frontend development to deliver user-focused, scalable products. Proven ability to collaborate across teams, lead design strategies, and transition from concept to product.

PROFESSIONAL EXPERIENCE

Mode Network Product Design & UI/UX (Contract) May 2024 – Oct 2024

- Delivered a new core app & web presence with updated features and focus
- Built a ready to use design system for future developers, with detailed custom components
- Led the creative vision for a large upcoming AIFI app, from initial concept to developer handoff

Mantle Senior Product Designer Dec 2022 – Sep 2023

- Worked across teams to build the initial project and rollout
- Designed UI materials for the main app and marketing assets

Windranger Senior Product Designer Feb 2022 – Sep 2023

- Led the production of a suite of web3 projects, both internal and for other clients
- Created scalable and re-useable end-to-end workflow systems for projects

Toptal Web Designer & Frontend Developer (Contract) Apr 2016 – Apr 2022

- Joined web/app projects as a contractor to help build out design and frontend code
- Collaborated across different teams, setting up proper workflow and project management systems
- Consulted with project leaders on best practices after each projects completion

ScubaGo UI Designer & Frontend Developer Apr 2019 – Jun 2020

- Built a dashboard and app platform for use across hundreds of independent dive centers
- Integrated complex data into an interactive and optimized component library

GoHiring Frontend Developer Apr 2017 – Mar 2019

- Built a dynamic job board app with hundreds of job board listings partner integrations
- Worked with a team to build a set of dynamic landing pages, branding assets and web components
